

Konstantino Vici

AI & Software Solutions – Remote (Worldwide)

Email: vici.konstantino@gmail.com

Website: konstantinovici.com

SUMMARY

I'm an AI-driven **Full-Stack Developer** and **Technical Strategist** with over nine+ years of hands-on experience building *scalable, ROI-focused* solutions. My passion lies in **agentic AI** — systems that proactively reduce manual work — integrated with **SvelteKit** or **Astro** frontends and **Go/Python/Node.js** backends.

I recently concluded a year-long deep dive into **advanced AI techniques**, further honing my expertise in next-generation automation and business-centric innovation. I'm available for **fully remote** collaborations and prioritize flexibility in scheduling, including extended work sprints to *meet your needs*.

SOFT SKILLS

- Flexible Work Approach
- Strategic Decision Making
- Proactive Ownership
- Adaptive Problem Solving
- Collaborative Communication
- Mentorship & Leadership

TECH STACK

- **Frontend:** SvelteKit/Astro (preferred), React
- **Backend:** Go, Python, Node.js
- **Databases:** SQL (Postgres, SQLite), NoSQL (Mongo, Redis)
- **DevOps/Tools:** Git, Linux, Docker, CI/CD pipelines
- **AI & Scalability:** Agentic AI solutions, microservices
- **Languages:** Russian, English

PROFESSIONAL EXPERIENCE

Independent AI & Software Research (Jan 2024 – Jan 2025)

- Focused on advanced AI architectures, emphasizing agentic workflows and LLM integration
- Developed prototypes for content generation, automated engagement, and workflow orchestration
- Evaluated performance across microservice and serverless frameworks to validate ROI

Web Tech Leader / Full Stack Developer — 7 Peaks Software (Feb 2019 –

Dec 2023)

- Rewrote a major client's web application from scratch, boosting PageSpeed by 615%
- Led full-cycle development for multiple projects, consistently meeting tight deadlines
- Integrated agentic AI features to reduce manual overhead and enhance business value
- Mentored developers and participated in hiring, fostering a robust technical culture

Full Stack Developer — Magora (Apr 2018 – Oct 2018)

- Gathered and refined user requirements for single-page applications targeting startup clients
- Coordinated closely with design and QA teams to implement feedback-driven improvements
- Ensured scalability for high-traffic demands using modern JS frameworks and Node.js

Full Stack Developer — MinerGate (Mar 2017 – Mar 2018)

- Developed back-end microservices, cutting memory usage by 70-90% and boosting performance by 30-50%
- Managed the entire development lifecycle, from initial planning to final release

Full Stack Developer (Freelance) (Apr 2014 – Feb 2017)

- Delivered custom solutions blending front-end and back-end innovation for diverse clientele
- Enhanced app efficiency and reliability by leveraging AI and automation where beneficial

ADDITIONAL HIGHLIGHTS

- **Agentic AI Focus:** Building proactive systems that reduce manual tasks and amplify results
- **ROI-Driven Mindset:** Every technical decision is grounded in real business value
- **Flexible Engagement Model:** Open to non-standard schedules and focused work sprints
- **Rate Preference:** Typically \$50–\$80/hour, aligning with project scope and complexity
